Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because it contains limitations drawn to an apparatus and process of manufacture. A single claim, which claims both an apparatus and the method steps of using the apparatus is indefinite.

This type of claim is indefinite because it fails to positively recite the boundaries of protection. The metes and bounds of the claim cannot be determined because it is unclear whether protection is sought for the method or for the apparatus.

As best understood by the examiner, claim 1 will be treated on the merits in this office action.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Honda et al. (U.S. 4,109,709) in view of Katayama (U.S. 3,921,710).

Honda discloses a heat pipe and method for manufacturing comprising:

- a pipe container, a fibrous wick structure arranged on the inner wall of the pipe ;

Art Unit: 3743

- the wick structure includes first and second fibers with different melting temperature (column 2, lines 9-35);
- the first and second fibrous wick structure are alternately woven with each other;
- the second fiber is arranged in a wrap and/or weft direction of the fiber wick structure of the screen mesh (column 5, lines 10-40 and column 8, lines 47-52).

Honda's invention discloses all of the claimed limitations from above except for the fiber wick structure being made of a spiral fiber bundle; and the fiber wick structure being made of a screen mesh.

However, Katayama teaches the use of a fiber wick structure (20) being made of a spiral fiber bundle; and the fiber wick structure being made of a screen mesh.

Given the teachings of Katayama, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the heat pipe of Honda with a fiber wick structure being made of a spiral fiber bundle; and the fiber wick structure being made of a screen mesh.

Doing so would provide a thermally efficient alternative wick structure.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references cited on the USPTO 892 discloses related limitations of the applicant's claimed and disclosed invention.
